Understanding Occupational Health and Safety for foreigners

Give your employees the best language experience with LLTI, for tailor-made training adapted to their objectives.

General Training Programme:

- Understand safety instructions, vocabulary relating to construction work, safety and prevention messages, employer’s instructions and internal regulation (type)
- Learn to formulate messages related to activities on the construction site, (construction and public works)
- Learn and strengthen the construction lexicon
- Understand the language of the manuals, machines and materials used
- Understand safety signs, nameplates, business travel, traffic regulations, road safety
- Perform/participate in role-plays (acting out and practicing real-life situations and safety games in French)

End Test:

Each trainee must be able to complete the language test on language at work and on safety in a professional environment.
